**NEW:**

# dialysis and renal transplantation

*Proceedings of the Fourth Conference of the European Dialysis and Transplant Association, Paris, 26-30 June, 1967*

**Editor:** David N. S. Kerr, Royal Victoria Infirmary, Newcastle-upon-Tyne, U.K.

**Associate Editors:** Daniel Fries, Lyon and R. Walter Elliott, Newcastle-upon-Tyne

This new volume is primarily concerned with regular dialysis for chronic renal failure and with renal transplantation. In addition there are important contributions on haemodialysis in the treatment of poisoning, problems of acute renal failure including gastrointestinal haemorrhage, lactic acidosis and protein loss complicating peritoneal dialysis.

- 450 pages
- Price: U.S. \$ 30.00/£ 12.11.0d Sterling/Dfl. 108,00 (post-paid)
- Publication date: February 1968
- International Congress Series No. 155

**ALREADY PUBLISHED:**

## renal failure and replacement of renal function

*Proceedings of the Second Conference of the European Dialysis and Transplant Association, Newcastle-upon-Tyne, September, 1965*

**Editor:** David N. S. Kerr;

**Associate Editor:** R. Walter Elliott

- 376 pages, illustrated
- Price: U.S. \$ 18.20/£ 7.12.0d. Sterling/Dfl. 65,50 (post-paid)
- International Congress Series No. 103

## replacement of renal function

*Proceedings of the Third Conference of the European Dialysis and Transplant Association, Lyon, June 1966*

**Editor:** David N. S. Kerr

**Associate Editors:** Jules Traeger, Daniel Fries and R. Walter Elliott

- 422 pages, illustrated, clothbound
- Price: U.S. \$ 20.80/£ 8.14.0d. Sterling/Dfl. 74,90 (post-paid)
- International Congress Series No. 131

Diagnosis of eye tumors

Thyroid diagnosis and treatment

Thyroid physiology

Cardiac output, scanning, and circulation times

Treatment of heart disease

Lung scanning

Liver scanning and function studies

Spleen scanning

Fat absorption studies

Treatment of cancer

Scanning and diagnosis of brain disorders

Blood and plasma volume measurements

Red blood cell mass and survival time determination

Diagnosis of pernicious anemia

Anemia studies

Bone scanning

Kidney scanning and function studies

Body water and space measurements

Treatment of leukemia and other blood diseases

## Abbott Radio-Pharmaceuticals Are Now Available World-Wide

Since 1948, when Abbott became the first pharmaceutical house to produce medical isotopes, we have paced the growth of nuclear medicine by pioneering in the development of radio-pharmaceuticals.

Today, this experience, these facilities, the finished products themselves, are available to doctors throughout the world.

From head to toe, Abbott offers a complete line of medical isotopes for screening, diagnosis, and therapy. Our "sorb" line is specifically indicated for economical *in vitro* screening, while our "scan" line is an invaluable diagnostic tool for visualizing

various organs of the body. The quality of radio-pharmaceuticals is assured by the research and manufacturing facilities of one of the world's great pharmaceutical companies.

Because many medical isotopes have such short half-lives, speed of production and delivery is essential. That's why Abbott's new plant is minutes away from Chicago's O'Hare International Airport. From here, we can rush shipments to any part of the world. Your order is sent via jet priority.

We are as close to you as your local branch. A phone call starts your shipment.
